

Business Analyst

The opportunity

We are looking for a Business Analyst to join the Analysis team, based in London Bridge (remote working initially). Reporting to the Head of Development, Architecture and Analysis, you will work alongside the existing team of four to share responsibility for the Analysis function, from gathering requirements from the business, through to technical and solution analysis.

This role is a fantastic opportunity to engage with a dynamic and diverse set of projects spanning across all of CLA's business function. You will become the sole point of contact for the systems you engage with and will have the opportunity to become the specialist in that domain. The projects are exciting and fast paced and would be a good opportunity to learn new tech skills and fully develop your analytical abilities.

What you will be doing

- Collecting and documenting of business requirements
- Producing technical solution analysis
- Using scripting and technical knowledge to solve technical problems
- Understanding and designing new IT Arch

Who you are

We are looking for a self-starting individual with the confidence and motivation to work on solo projects and we need an individual who is willing to learn new technical skills. You must have proven Business and Technical Skills, be a strong communicator and able to communicate at any level of the business. You must be comfortable working to tight deadlines, and shouldering the responsibility of successful delivery of the projects.

The successful applicant will have:

- Very strong Business Analysis skills
- Very strong Technical Solution Design skills
- Experience of developing in Java or .NET.
- Experience of developing/scripting with SQL.
- Experience of working with PowerBI.
- Experience working in Agile and Hybrid (Agile/Waterfall) project teams
- Excellent written and verbal communication skills
- Innovative and proactive nature
- Experience working with Confluence, JIRA and Smartsheet
- Proven experience of working on solo projects
- Experience of working with Salesforce (ADM 201 or DEV 401) preferred.
- Experience of working with Azure
- Experience of working with API's/webservices
- Experience of working with SQL or other database technology.

If you are interested in applying, please send your CV along with a covering email or letter outlining why you are suitable for the role and how you meet the key requirements for the role. Applications should be sent to Nicola Stalley, HR Administrator (nicola.stalley@cla.co.uk) by no later than EOD on **Friday 18 June 2021**.
